PROFESSIONAL SUMMARY

Computer Science graduate building full-stack apps with React, Node.js, and PostgreSQL. Built and deployed CircuLib and a Java billing engine, with nine merged open-source pull requests, including freeCodeCamp. Looking for a full-stack developer or SDE role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, SQL

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, async/await, error handling

Databases: PostgreSQL, MongoDB; SQL queries, transactions, stored procedures

Frontend: React.js, HTML5, CSS3, Material UI, Vite, Recharts, Responsive Design

Tools & Deployment: Git, GitHub, Postman, VS Code, Vercel, Render

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

CircuLib | React.js, Node.js, Express.js, PostgreSQL Live demo | Source code

- Built and deployed a full-stack library platform with separate Admin, Librarian, and Student interfaces.
- Built Express REST APIs for catalog, circulation, reservations, reviews, fees, and search, with JWT login and role-based access.
- Used async/await for API handlers and database calls, with input validation and error handling.
- Implemented checkout and return workflows with PostgreSQL transactions and stored procedures.
- Connected React screens and Recharts dashboards to the API; deployed the frontend on Vercel and backend on Render.
- Added membership types with borrowing limits, loan periods, and daily late fees, plus SQL reports for inventory, circulation, overdue loans, and member balances.
- Built student features like a wishlist, book reviews, and reservation requests, with announcements and light/dark themes.
- Made CircuLib open source and maintain it as a library management system.

Smart Billing & Discount Engine | Java, OOP, Design Patterns

- Built a Java billing engine for percentage, fixed-value, and buy-one-get-one discounts using the Strategy Pattern.
- Used composition-based discount injection to keep pricing logic modular and independently testable.

OPEN SOURCE CONTRIBUTIONS

Contributor | freeCodeCamp, PdfZero, career-ops, Platypus, RoleCraft, activist, and kinshow

- freeCodeCamp: added a 1901 non-leap-year test to the leap year calculator lab. Merged PR #70721
- PdfZero: added a keyboard shortcuts help overlay. Merged PR #9
- career-ops: switched five doctor test suites to the shared retrying file-removal helper. Merged PR #4728
- career-ops: fixed the first row being skipped in headerless scan history; added tests. Merged PR #4807
- Platypus: fixed pull-to-refresh clearing cached data; added a regression test. Merged PR #1149
- RoleCraft: added regression tests for slug-collision checks. Merged PR #360
- RoleCraft: added macOS to the CI test matrix. Merged PR #365
- activist: converted px values to rem units and added a units section to the style guide. Merged PR #2449
- kinshow: added a schema-version guard for localStorage data. Merged PR #432

EDUCATION

B.Tech, Computer Science Engineering | 2021 - 2025

Roorkee Institute of Technology, Uttarakhand

Relevant coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks

ACHIEVEMENTS

- 9 merged PRs across 7 external open-source projects: freeCodeCamp, PdfZero, career-ops, Platypus, RoleCraft, activist, and kinshow.
- Open-sourced CircuLib under the MIT license; writes beginner-friendly issues and reviews pull requests from outside contributors.
- Suggested a testing fix for a freeCodeCamp curriculum issue (#70470). A maintainer called it the best approach and asked the contributor to update their existing PR to follow it.
